

Early Career Teachers' Seminar

Moving from Surviving to Thriving

This seminar is now a full day event based on feedback from previous attendees who said half a day simply was not enough!

Hear how experienced teachers plan, implement, assess and continuously improve their teaching in the Australian Curriculum: HPE. Identify some great support materials and pedagogical approaches to inform your teaching of Physical Education. This seminar is also an excellent opportunity to meet and begin to network with other PE teachers.

This seminar will support graduate teachers in the initial years of teaching HPE and offer practical support and innovative strategies including the provision of a mentor to support you throughout 2018.

The seminar will address issues such as behaviour management, report writing, parent interviews, programming and sequencing learning. The seminar will enable you to become part of our professional learning community to assist you as you begin your career.

Previous seminars have booked out quickly, so enrol early to avoid disappointment.
